TRẦN THẾ HÀO

ABOUT ME

Software Engineering graduate (all credits completed, degree expected Nov 30, 2026) with hands-on experience testing and debugging my own games and web platform. I have diagnosed asset-loading issues, UI bugs, and browser compatibility problems, and I trace problems back to their root cause. Familiar with many game genres (FPS, MOBA, battle royale, puzzle, casual) and eager to start a career in game quality assurance.

EXPERIENCE

Robot Eureka – 2D Physics Simulation & Puzzle Game

Role: Game Designer & Developer | Demo: https://robot-physic-eureka.vercel.app/
Technologies: Cocos Creator 3.8, TypeScript, Physics 2D, WebGL/HTML5, Vercel, Git

- Designed puzzle levels built around 3 physical phenomena: spring elastic force (Hooke's law), refraction/reflection of light through a lens system, and cable–pulley mechanics in an elevator.
- Built interactive mechanics: players adjust parameters themselves and see results instantly (light rays drawn dynamically with 2D raycasting, 2D collider collisions, gravity counterbalancing/lifting).

Shi with You – English Learning Game for Children

Role: Game Designer & Developer | Demo: http://shiwith-you.vercel.app/
Technologies: Godot Engine 4, Vercel, Git

- Wrote 17 test cases (functions, edge cases, audio, slow network, browsers) and logged 5 bugs in Jira with steps to reproduce, environment, and priority.
- Diagnosed and resolved asset-loading (images, audio), UI, and browser-compatibility issues.
- Designed scenarios for four mini-games (Memory Card, Picture Match, Word Catcher, Spell Bridge) and managed data files across platforms.

Eureka – Physics Learning Website

Role: Developer & System Designer | Demo: https://eureka-th.vercel.app/
Technologies: ReactJS, Supabase, Authentication, Vercel

- Implemented a 4-role permission system: Guest; Student (lectures, physics calculator, games, 1v1 PK mode); Teacher (create classes, assign work); Admin (manage users and content, approve teachers).
- Serves as the platform hosting the Robot Eureka game (embedded via iframe).

SKILLS

- **Testing & Debugging:** Test cases, bug reports, Jira (practice project).
- **Games Played (mainly earlier years):** FPS (Truy Kích, Đột Kích), Battle Royale (PUBG Mobile), MOBA (Liên Quân Mobile), Sandbox (Minecraft, Roblox), Casual/Puzzle (Coin Master, Brain Out, Helix Jump, Temple Run, Plants vs. Zombies).
- **Game Design:** Gameplay mechanics, level design, educational games, mini-games, playtesting.
- **Engine & Code:** Godot Engine 4, Cocos Creator 3.8, TypeScript, Physics 2D, WebGL/HTML5.
- **Web & Systems:** ReactJS, Supabase, Auth/role-based access, Vercel (CI/CD), Git/GitHub.
- **Soft Skills:** Design thinking, self-motivated learning, teamwork.

CERTIFICATION

Microsoft Office Specialist Certification
Derive Insights from BigQuery Data Skill Badge

EDUCATION

Nguyen Tat Thanh University (2022 – 2026)

Faculty of Information Technology - Software Engineering, GPA: 3.61 | Degree expected Nov 30, 2026.
